Week-2

What we are going to learn.

① Conditional operators

< . > . ≤ , ≥ ....

== → equal to (for an relation)

! => not equal to (≠)

>= greater than

<= less than

>== at least

<== at most

:=> Then

② if

if-else

if = elif

③ loops — while

for

do while

example :

```
a = 7
b = 20
print (a > b)
```

↓

Boolean

True False

output
False

Note :- a = b → assignment statement

a == b → conditional statement

condition

A	B	A or B
T	T	T
T	T	T
F	T	F
F	T	F

A	B	AorB
T	T	T
T	F	F
F	T	F
F	F	F

Example:

a = 17

b = 14

c = a > b

=> Print (f" a is (a>")
Print (f"b is (b)")
Print (f"C is <a>b>")

or

print (f"a is <a>\n b is <b>\n c is <c>")

output => a is 17
b is 14
c is True
